

Security by design

Built with a security-first approach, our RWS® Language Cloud platform is hosted by our Cloud Operations Organization. Our cloud deployment ensures a secure environment for clients to manage their content and data.

Security at every touchpoint

Data residency

RWS Language Cloud is hosted in Germany, which has the strictest data protection regulations in the EU.

ISO 27001 certified and SOC 2 compliant

Our facilities, teams, policies and procedures are regularly audited by external assessors to ensure compliance with major information security standards.

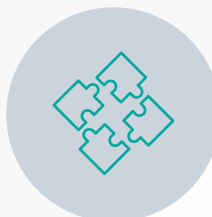

OWASP testing

We regularly run rigorous vulnerability scans using the Open Web Application Security Project (OWASP) Top Ten Web Application Security Risks.

GDPR compliance

Any personal identifiable information (PII) can be edited, exported and deleted on request.

Data separation

There is clear separation of data within the RWS Language Cloud application.

Data encryption

Data is encrypted both in transit and at rest, providing further protection against any potential security breach.
